Dette er valgfrit, hvis du er nervøs for at andre skal gå ind på din 'Visit Japan Web' side.

Flerfaktorautentificering øger sikkerheden ved at kræve indtastning af en verifikationskode ud over en adgangskode, når du logger ind. Opsætning af flerfaktorautentificering er valgfri, men hvis du konfigurerer det, kan du undgå risikoen for uautoriseret adgang, selv hvis din adgangskode er kendt af andre. For at bruge flerfaktorautentificering skal du installere en app til tidsbaseret engangskode (TOTP) autentificering.

Setting up Multi-Factor Authentication(optional)

Do you want to set up multi-factor authentication?

Multi-factor authentication enhances security by requiring the input of a verification code in addition to a password when logging in. Setting up multi-factor authentication is optional, but if you set it up, even if your password is known to someone else, you can avoid the risk of unauthorized login. To use multi-factor authentication, you need to install any time-based one time password(TOTP) authentication app
