Dette er valgfritt, og skal brukes hvis du er nervøs for at andre skal gå inn på din 'Visit Japan Web'-side.

Flerfaktor-autentisering øker sikkerheten ved å kreve at man skriver inn en bekreftelseskode i tillegg til ditt valgte kodeord ved innlogging. Oppsett av flerfaktor-autentisering er valgfritt, men hvis du konfigurerer den kan du unngå risikoen for uautorisert adgang, selv hvis ditt kodeord/passord er kjent av andre. For å bruke flerfaktor-autentisering skal du innstallere en app til tidsbasert engangskode (TOTP) - autentisering.

Setting up Multi-Factor Authentication(optional)

Do you want to set up multi-factor authentication?

Multi-factor authentication enhances security by requiring the input of a verification code in addition to a password when logging in. Setting up multi-factor authentication is optional, but if you set it up, even if your password is known to someone else, you can avoid the risk of unauthorized login. To use multi-factor authentication, you need to install any time-based one time password(TOTP) authentication app
