Setting up your multi-factor authentication

Multi-factor authentication (MFA) gives you an extra layer of security and keeps your personal information secure from cybercrime attacks and hackers.

To set up MFA, you will need to install an authenticator app on your mobile or desktop and connect your ImmiAccount to this app.

Once set up, whenever you log in to ImmiAccount, you will enter:

- your username and password
- a code from the app.

Do you have an authenticator app?

☐ I am new to this and need to install an authenticator app

Install an authenticator app on your personal device (smartphone or computer).
Some free examples of authenticator apps are Google Authenticator and Microsoft Authenticator.

☐ I already have an authenticator app

Use an authenticator app you already have on your personal device (smartphone or computer).
Some free examples of authenticator apps are Google Authenticator and Microsoft Authenticator.

Important message for selected pre-application ballot applicants

If you have been selected to apply for the following visas, you can only use your Ballot Registration ID once to submit your visa application via ImmiAccount. You cannot delete and start a new visa application with the same Ballot Registration ID.

- First Work and Holiday visa (subclass 462) for passport holders from China, India and Vietnam
- Pacific Engagement visa (subclass 192)

If you attempt to commence more than one application in ImmiAccount with the same Ballot Registration ID, you may receive the following error that will prevent you from completing your payment:

'A visa application has already been submitted for payment related to this Registration ID. Only one visa application can be submitted against each Registration ID.'

If you encounter this error, complete the [ImmiAccount Technical Support Form](#) and provide a scanned copy of your passport photo page to seek help.

Mandating 3 Domain Secure (3DS) for card payments

From 08/09/2025 all cards need to have 3 Domain Secure (3DS) authentication enabled (by your bank), before you can make a payment. If you do not have 3DS enabled, you will receive the following error that will prevent you from completing your payment.

- Error performing card authentication. Please use other card/payment method

3DS is a password-protected system, used to confirm your identity, before a payment is deducted. If you need help to enable 3DS, or more information about this security feature, **please contact your bank**. The Department cannot provide advice or assistance to enable 3DS on your card.
