Detta är valfritt, om du är orolig för att andra går in på din sida på 'Visit Japan Web'.

Multifaktorautentisering (MFA) ökar säkerheten och kräver att en verifikationskod skrivs in förutom ett lösenord när du loggar in. Att skapa multifaktorautentisering är valfritt men om du gör det minskar du risken för obehörig tillgång även om andra vet ditt lösenord. För att använda MFA måste du installera en app för tidsbaserade engångskoder (TOTP) för autentifikation.

Tryck 'Next' efter att du gjort ditt val.

Setting up Multi-Factor Authentication(optional)

Do you want to set up multi-factor authentication?

Multi-factor authentication enhances security by requiring the input of a verification code in addition to a password when logging in. Setting up multi-factor authentication is optional, but if you set it up, even if your password is known to someone else, you can avoid the risk of unauthorized login. To use multi-factor authentication, you need to install any time-based one time password(TOTP) authentication app.
